

PROCUREMENT, EQUIPMENT AND INVENTORY MANAGEMENT

WITHOUT ENTERPRISE PROCUREMENT, EQUIPMENT AND INVENTORY MANAGEMENT

No Integration

Using multiple software to manage procurement, purchase orders, equipment and inventory can leave companies disorganized. The combination of paper and electronic documents may lead to avoidable administrative errors such as incorrect entries and data loss.

Lack of Document Tracking

Without a consistent Document Management solution in place, keeping track and collecting important documents becomes increasingly difficult. With purchase orders, invoices and work orders spread out, additional time is needed to search and find the appropriate data, which slows down a business' workflow.

Limited Control

An integrated procurement, equipment and inventory management solution is integral in providing businesses with up-to-date documents and important data. Without a solution in place, owners and managers are unable to attain control and are more susceptible to overlooking mistakes.

Poor Visibility

Without real-time access to procurement, equipment and inventory records, owners and managers are unable to gain a complete view of how the business is doing. With difficulty in retrieving important information, and data spread out across multiple systems, making accurate business decisions becomes a challenge.

PROCUREMENT, EQUIPMENT AND INVENTORY MANAGEMENT

WITH ENTERPRISE PROCUREMENT, EQUIPMENT AND INVENTORY MANAGEMENT

Jonas' Procurement, Equipment and Inventory Management provides businesses with a fully integrated, collaborative, controlled and automated system. With Jonas, reduce inputting errors, centralize important documents and gain greater visibility into the business' operations. Analyze monthly costs and maintenance of all equipment, and track, receive and easily search for all inventory on hand. With Jonas' management system, reduce manual entry, improve workflow and utilize all equipment and materials more efficiently.

Full Integration

Procurement, Equipment and Inventory Management is fully integrated throughout Jonas, and provides a central location for all purchase orders, invoices and subcontracts. With all related documents segmented accordingly, up-to-date reports can be generated instantly.

Accurate Tracking

Rather than using multiple systems, Jonas reduces the need for paperwork and creates a fully electronic tracking solution. All necessary procurement, equipment and inventory documents are recorded, sorted and accounted for. With Jonas, reduce common data entry mistakes and keep track of all documents in an easy-to-use dashboard view.

Save Time

Instead of operating procurement, equipment and inventory management separately, utilize Jonas' integrated system to enhance efficiency and streamline operations. Reduce the time spent looking for paper documents and leverage Jonas' intuitive search and retrieval functions to locate purchase orders, invoices, equipment and inventory data in seconds.

Enhanced Visibility

Through Jonas' fully integrated system, gain access to all purchase orders, procurement records and equipment or inventory reports to make accurate business decisions. Be more proactive by gaining greater insights into the intricacies and details of the business, and operate a more profitable company.

“ Integrated P.O. and inventory systems have saved manpower, prevented input errors, provided cost controls on purchases, and provided paperless tracking of obligations.”
BRUCE KIGER,
Vice President,
Continental Flooring
